

Helpful to achieve the objective		Hamper achieving the objective	
Internal origin (attributes of the system)	<p>Strengths</p> <ol style="list-style-type: none"> Extensive experience: 24 years in IT, demonstrating knowledge and expertise in various functions within the IT area. Diverse technical skills: I am proficient in operating systems (Windows, MacOS, CentOS), cloud platforms and networking technologies. Leadership experience: I have performed multiple roles as IT Manager and Team Leader, demonstrating management capabilities. Problem-solving skills: I have robust hardware and software troubleshooting skills. Customer service orientation: Consistently high ratings in client satisfaction surveys. Adaptability: I have experience working in various sectors (Casino, Banks, television, IT services, factories). Project management: Involvement in delivering business/IT projects. 	Weaknesses/Areas for further development	<ol style="list-style-type: none"> Frequent job changes: When I reviewed my curriculum, I noticed that I had held multiple positions in relatively short periods, an average of two years, which indicates difficulty in making a long-term commitment. Potential skill gaps: Rapid technological advancements have created gaps in my knowledge of the latest technologies in terms of programming languages. Lack of formal certifications: Despite having worked for several years configuring and managing Cisco switches and firewalls and working with administering AWS, I don't have any certifications in CISSP, CCNA, or AWS. Possible over-specialisation: I have had an MCSE certification since 2003 and a strong focus on Windows environments, limiting my versatility in other operating systems. Limited experience in emerging technologies: I recognise my lack of expertise in AI, machine learning, or big data.
	<p>Opportunities</p> <ol style="list-style-type: none"> Cloud technology expansion: I need to leverage my experience in Azure and AWS to further specialise in cloud computing. Cybersecurity focus: Given security's increasing importance, there is an opportunity for me to develop expertise in this area. Leadership or consulting roles: My extensive experience across multiple industries makes me valuable for leadership roles, consulting, or freelancing. Training and mentoring: I can share knowledge by training junior IT professionals or writing technical content. Specialisation in compliance: I can develop expertise in IT compliance and regulations, which is increasingly important. Innovation projects: I seek opportunities to lead organisational digital transformation initiatives. 		<p>Threats</p> <ol style="list-style-type: none"> Rapid technological change: The fast-paced evolution of IT may require me to upskill to remain relevant constantly. Automating IT tasks: Some traditional IT support roles may become automated, reducing my job opportunities. Increased competition: The IT field attracts more professionals, potentially increasing job competition. Outsourcing trends: Companies may outsource IT functions, reducing job opportunities. Lack of industry-specific certifications: I may be disadvantaged compared to candidates with more specific certifications.
