

Unit 6 – Reflection:

Throughout unit 6, I had the pleasure of working alongside my peers on an exciting assignment project, the Development Team Project: Design Document. As a proactive team member, I took the lead and began researching the topic at the beginning of the week. I spent four days diligently taking notes and gathering valuable information to share with my colleagues.

Once I had gathered enough information, I scheduled a meeting with my fellow team members to discuss our game plan. Together, we divided the tasks and responsibilities among ourselves and worked collaboratively to complete the project. It was truly a great experience and I am proud of the hard work we put in.

Unfortunately, on the fourth day of studying, I fell terribly ill and was unable to continue at the same pace. I had to take a step back and focus on my health, which meant slowing down my study pace. However, because of my early contributions, my colleagues were able to pick up where I left off and seamlessly complete our tasks.

Through this project, I learned the importance of effective collaboration and trust within a group. It was truly eye-opening and I am grateful for the experience.
