

## **Unit 12 – Reflection:**

During the past week, I've been diligently preparing to submit my reflection for the last assignment and gearing up for the seminar on Future Trends in SEMP. I found the unit study particularly engaging as it allowed me to grasp once again the emerging project management trends. It's truly fascinating to be exposed to this kind of knowledge. While working on my reflection assignment, I realised that devising a solid action plan is the crucial next step for solidifying my understanding of this module. Furthermore, pursuing additional project management certifications would significantly enhance my expertise in the field.
