

## **Unit 6 – Reflection:**

This past week has been particularly demanding, as my team and I had to wrap up and submit our assessment for the project we have been working on. In addition, we were required to produce a report that evaluated our colleagues' behaviour and contributions during the week's work. Despite the challenges, I am thankful for the opportunity to learn and grow through these tasks, and I am proud that we successfully submitted our project report.

One of the key activities I focused on this week was the 'Jupyter Notebook Activity—pytest.' This exercise helped me recognise the vast, intricate, and indispensable nature of Python testing. Although I am enrolled in other Python courses to enhance my knowledge and skills in this area, I understand that I need to practice more and become more involved to improve my abilities. Continued learning and hands-on experience will help me hone my skills and become more proficient in Python testing.
