

## Feedback for RRMP Literature Review [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Hainadine Chamane
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

The formative appears to outline a very focused and concise approach to your subject, and you appear to have thought about this carefully at formative stage. You now need to translate that into the actual summative itself.

Its good to see that you understand the formative needs a concise introduction and conclusion with the bulk of the 2,000 words being in the actual LR summative discussion section of the summative.

Good to also see, that all through the formative you appear to speaking of the strengths and limitations of research and translating that into the actual Literature Review summative itself.

You have started to gather research resources at formative stage and this should help you further focus on how to draw together a core focused argument for the summative itself.

**\*The below general information is circulated to all students from formative, looking forward to summative:**

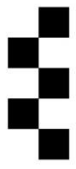

For the actual summative, ensure that citation is occurring all the way through your content. In-text citation then needs to be reflected in a list of references at the end of the assignment. That list of references needs to be in alphabetical order at the end of the assignment.

For summative ensure that your writing style is wholly formal and academic. Also remember to apply page numbers to your summative document. Ensure that your summative has a critical 'pros and cons' view of discussion, looking at both the positives and negatives of the research that you choose to engage with. It is really important not to just look at one side of research. The content of summative needs to examine different publications and look at different perspectives.

As discussed in live seminars and in student support on the online hub, research for this module is just from secondary research, [and so research that is already in the public domain]. No primary research, [interaction with actual people] is to take place in this module.

Wishing you the best of luck now for your actual summative,

With best wishes

Karen
