

Feedback for RRMP Research Proposal Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Hainadine Chamane
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

This looks like a topic that you may take forward for a Capstone project and so if this is the case, make that clear in research proposal presentation. The topic you have picked is interesting and at Capstone level would have a lot of different research that you could leverage and no doubt will allow you to develop 'new knowledge' at that phase of study. For the RPP, ensure that you focus down on one core aspect of the study at this stage, so that your research isn't too wide spread. Get a focused and concise approach to your research, so that there aren't too many discussion points going on around the topic as 'cultural difference' can be a broad term depending upon the research angle you take.

**General advice to all students:**

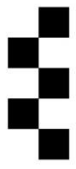

Remember to cite on your power presentation, in your transcript and also orally cite in your oral presentation for this summative. Ensure that you have a long list of references in alphabetical order on your power at the end of the presentation and at the end of your transcript. Please refer to seminar 5 if you are unsure about any of these details.

**\*This comment is added to every student formative feedback sheet:** Please ensure that when you complete your summative submission for the Research Proposal Presentation, that the research, content and context is **COMPLETELY DIFFERENT** to your Literature Review. This is for several reasons; you need to avoid self-plagiarism, [if content is close to or similar to the Literature Review TURNITIN will detect this], a summative can only be graded once and so if your LT and RPP are too similar theoretically it is the same piece of work and summative academic work has to 'build' upon research so that every summative submission is different from the previous summative submission. *This is a standard academic rule in all academic writing/summative submission.* And so, you can 'build' upon your subject from the Literature Review to the Research Proposal Presentation, but it **MUST** different from the Literature Review.

The burden of ensuring each summative is 'new' rests with the student, and so please do observe the above when completing all summative submissions, thank you.

**\*Please also ensure that you engage with critical analysis in your content, and you debate a 'pros' and 'cons' perspective for your research, in your RPP summative.**

Wishing you the best of luck now for your actual summative submission,

With best wishes

Karen
